

Our Vision

The vision of Goulburn Valley Primary Care Partnership (GVPCP) is a healthy, empowered and resilient community.

Our Mission

Our mission is to enable collaborative approaches to enhancing whole of community wellbeing.

Our Role

The role of GVPCP is to facilitate active partnerships for prevention, responsive to local needs.

Our Focus

Our focus in this transitioning year, is on Partnerships for Prevention.

Impacts

The impacts of our focus will be reflected in;

- *Effective partnerships*
- *Collaborative planning, actions and evaluation*
- *Workforce capacity*
- *Information sharing*

Guiding Principles and Values

This transitional plan remains consistent with state, regional and local policy directions and plans.

INTRODUCTION

The 2018/19 period marks the end of the current Primary Care Partnership (PCP) Program Logic, and quite possibly the end of an era in the way PCP's have operated until now.

A new program/business model is on the horizon, yet to be announced by DHHS, as is an announcement from the State government regarding ongoing funding for PCPs beyond June 2019.

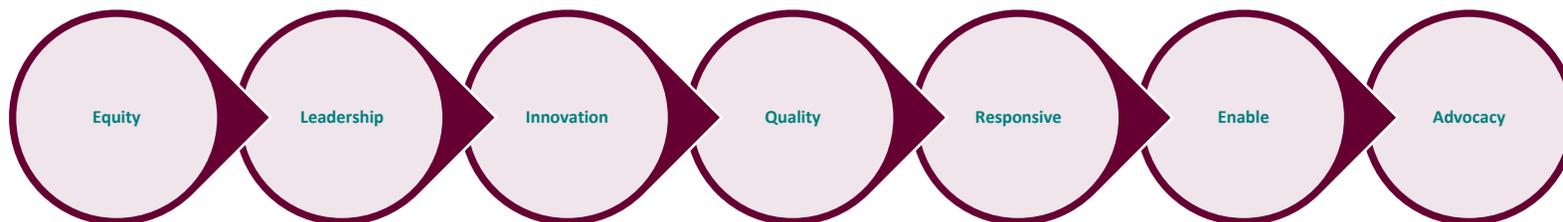

In consideration of the coming period of uncertainty, a 2-year transitional strategic plan has been developed by GVPCP. Our focus will be on partnerships, building on the remaining priorities from the previous plan and with an eye toward the future to prepare GVPCP to be able to transition seamlessly into a new business model and potential new direction, whilst ensuring closure to current important population health strategies.

The GVPCP team looks forward to working with local partners in the coming year, and beyond.

Craig Chadwick
 Executive Officer

Partnerships for Prevention

**Role
of
GVPCP**

To facilitate active partnerships for prevention, responsive to local needs

**Domains
(PCP
Program
Logic)**

Prevention

Systems Integration

Family Violence

**Action
Areas**

Catchment activities will focus on place-based, people-centred, healthy and sustainable environments as the key action areas to address health and wellbeing priorities, in line with Victorian government policy

Objectives

To facilitate active contribution of partners to enhance whole of community wellbeing

To align partnership efforts to plan and develop environments and support settings that improve population health outcomes

To be responsive to and influence decision making at local, regional, state and national level

Impacts

Effective partnerships

Collaborative planning, actions and evaluation

Workforce capacity
